

INDUSTRIAL 4 LAND BELOW THE 35 m HORIZON MASK

SpaceOps proposed 5-degree horizon mask | Indicative overlay on the supplied zoning map

OVERVIEW - SOUTH-EASTERN TIP OF INDUSTRIAL 4

DETAIL - ORANGE HIGHLIGHT SHOWS THE RELEVANT LAND

Industrial 4 land where the proposed horizon mask is below 35 m

A 35 m building on the orange land would penetrate the proposed mask and require SpaceOps written approval. Lower buildings may remain beneath the mask. This is an approval area, not an absolute prohibition on development.

GEOMETRY: $H = 2 + d \tan(5 \text{ degrees})$. At $H = 35 \text{ m}$, $d = 377.2 \text{ m}$ from the nearest SpaceOps site boundary; level-ground assumption.
LIMITATIONS: No surveyed ground levels or Fresnel-zone clearance are represented. No site-area measurement is certified. Other planning controls still apply.
